Sequence 46, Application US/09616289

Patent No. 6632923

GENERAL INFORMATION:

APPLICANT: Lees, Ann M.

APPLICANT: Lees, Ann M.

APPLICANT: Lees, Ann M.

TITLE OF INVENTION: NOVEL LOW DENSITY LIPOPROTEIN BINDING

TITLE OF INVENTION: PROTEINS AND THEIR USE IN DIAGNOSING AND TITLE OF INVENTION: ATHEROSCIEROSIS

TITLE OF INVENTION: ATHEROSCIEROSIS

TITLE OF INVENTION: ATHEROSCIEROSIS

TITLE OF INVENTION: ATHEROSCIEROSIS

FILE REFERENCE: 10797-004401

CURRENT APPLICATION NUMBER: US 09/517,849

PRIOR FILING DATE: 2000-07-14

PRIOR FILING DATE: 1997-11-26

PRIOR FILING DATE: 1997-11-26

PRIOR FILING DATE: 1997-06-03

NUMBER OF SEQ ID NOS: 53

SOFTWARE: FastSEQ for Windows Version 4.0

SEQ ID NO 46

LEWALTH: LABBER OF SEQ ID NOS: 53

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence 17,

 MEDIUM TYPE: Floppy disk.
COMPUTER: IBM PC compatible
COMPUTER: IBM PC compatible
COMPUTER: IBM PC compatible
COMPANDES: Patentin Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/533,306A
FILING DATE: September 25, 1995
CLASSIFICATION: 435
ATTORNEY/AGENT INFORMATION:
NAME: Smith, Deann F.
REGISTRATION NUMBER: 36683
FREREANCE/DOCKET NUMBER: 2115-00869COB
TELECOMMUTICATION INFORMATION:
TELEPHONE: (810) 641-0200
INFORMATION FOR SEQ ID NO: 5:
SEQUENCE CHARACTERISTICS:
LENGTH: 2660 base pairs
TYPE: nucleic acid
STRANDEDNESS: double
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  ORGANISM: Homo sapiens
INDIVIDUAL ISOLATE: Sample 2
TISSUE TYPE: Acute myelomonocytic leukemia, M4Eo
TISSUE TYPE: subtype (inv16)
